

No-Cost Home Weatherization Available for Qualified Households in St. Johns and Clay Counties

The non-profit St. Johns Housing Partnership (SJHP) Weatherization Assistance Program provides no cost energy-efficiency improvements to qualified homeowners in St. Johns and Clay Counties.

What is Weatherization?

A comprehensive set of measures performed by SJHP to improve the energy efficiency of a home.

The repairs focus on building performance that reduces energy consumption and improves indoor air quality.

Three Good Reasons to Weatherize

Health: Documented studies have shown some improvement in occupant health or indoor environmental conditions. Some studies also observed reductions in asthma or respiratory related emergency department or hospital visits.

Energy Savings: Weatherization can lead to substantial reductions in energy consumption. A home remains warmer in the winter and cooler in the summer, reducing the need for excessive heating and cooling.

Lower Utility Bills: Reduced energy consumption directly translates into lower utility bills. Over time, the cost savings can be substantial, making weatherization a wise and cost-effective investment.

Not taking advantage of the no-cost SJHP Weatherization Assistance Program is a missed opportunity for low-income residents, who spend more of their income on energy and whose health is more likely to be affected by asthma, cold, and heat.

Contact SJHP to see if you or someone you know qualifies.

ELIGIBLE APPLICANTS: To qualify for the Weatherization Assistance Program, the total household income may not be more than 200 percent of the national poverty level. [SJHP has more information.](#) Preference is given to owner-occupied homes, elderly (60 years-plus) or physically disabled residents, families with children under 12 and households with a high energy burden (repeated high utility bills).
